SWEDISH DESIGN AT ITS MOST BEAUTIFUL

COMFORTABLE BEDS & BEAUTIFUL FABRICS

ACCESSORIES

THAT GIVE YOUR
BEDROOM A LITTLE EXTRA

YOUR BEDROOM GUIDE

HOW TO REACH A SLEEP YOU
JUST DREAM ABOUT

NOT ALL BEDS ARE CREATED ALIKE

You usually say that sleep and health belongs together. Have you ever slept in a really good bed then you know the difference. We at Viking Beds of Sweden therefore see that we have an important task: create beds that make you sleep deeper and your dreams more beautiful.

Every bed that leaves the factory is the result of a work process in the search of the perfect sleep. All our beds are designed and manufactured to give your body maximum of comfort and recovery.

Our beds are modern day furniture pieces that will grace your bedroom for many years to come. We place a high degree of importance in model designs, choice of fabrics, strong assortment of bed legs and selection of a wide variety of beautiful headboards to personalize your Swedish beds like none other. Each line is carefully balanced, all details carefully thought through - that makes the differences.

It may take time to try to find your dream bed. You are invited to visit one of our authorized dealer representative who will expertly guide you to finding the ultimate combination of design and comfort that will best fit your personality and style of living. With the right choice you can sleep well and get the recovery you need. You are worth it.

WELCOME TO THE DREAM FACTORY

Magnus Söderberg, CEO of Viking Beds of Sweden

Each bed that leaves our factory is a genuine craft designed to make you sleep well and wake up refreshed. But what's required to create a bed? Enter the factory in Landsbro, Småland.

With the roots in the furniture kingdom of Sweden, the desire to create good beds has been found in the Viking Beds of Sweden's DNA right from the start. The company's three factories are located in the middle of the Småland forests. The entrepreneurial spirit and passion for making the best beds possible is a legacy.

- We pride ourselves in combining Swedish bed-making tradition with modern design and inn-

ovative technology. It is, for example, about using new types of materials and finding ways to combine these with traditional crafts, says CEO Magnus Söderberg.

The company employs about 75 people. Each bed that is manufactured and handmade together with the utmost care. When the bed frame is in place, it takes a good piece of furniture wrappers.

- A bed from us will last for many years, and it is many times the care of the details that make it possible. Each seam is equally important, we take pride in making the best quality beds possible," says Magnus.

Above the factory, on the 2nd floor, is the work of

BED MANUFACTURING FROM A TO Z

To create a really good bed requires knowledge of materials, anatomy, design and construction. At Viking Beds of Sweden we have gathered the top in these areas. When the product development team gets an idea, they discuss it with engineers, buyers, designers and upholsterer about how to get the new product in the best possible way. The things we are looking at are frame, spring layer, pocket, covers, upholstery and finally fabrics and accessories.

For us at Viking Beds of Sweden, longevity, quality, comfort and choice are in focus, so these factors are weighted into everything we do. Once all the pieces of the puzzles are made, materials, design and comfort are well proven, the production will start. Each bed is a result of the customer's wishes, the best materials available, our experience and, not least, a solid craftsmanship that still lives and develops here on site in Småland, in the middle of the Swedish forests.

new bed models and accessories in progress. Design sketches for the upcoming fair hanging on the walls as well as mood boards with pictures, materials and fabric samples. This is a job based on what will be the coming collection. Viking Beds of Sweden has its own design team, just as it relates to product development and production.

- To keep it local is important, thanks to that, we can get an idea in the morning and have a prototype ready in the afternoon. The flexibility of our production system and the experience of our employees is what makes Viking Beds of Sweden possible - along with our constant pursuit of the highest quality, Magnus Söderberg concludes.

Exclusive continental in Verona fabric, headboard Zoe and plinth Trend

EXCLUSIVE CONTINENTAL

Our most exclusive bed, uncompromising in its design and with wonderful comfort. The mattress system measures 57 cm in height and is made up of pocket springs in four different layers - a solution that you only find with us. The top spring layer consists of individual X-pocket springs with unbeatable surface softness. The spring layer mattress has seven zones that follow your body perfectly, as well as latex- padding for added comfort. The spring layer mattress is made in one piece - but you can have different firmness on the left and right sides. Exclusive is a bed for those who want the absolute best.

WAKE UP TO ANOTHER GREAT DAY

Our vision is to give you a perfect sleep and a bedroom you never want to leave. To make our vision a reality, there is an ongoing development work at Viking Beds of Sweden. We always look into new creative design ideas, keep up to date with the latest findings about materials, we grind our crafts and constantly try new ideas. We do not leave anything at random. Your well-being is always our main source of inspiration.

Now you have the opportunity to create a room in the room with a furniture in addition to the usual - our new four-poster bed.

MATERIAL

When we start looking at the materials in our products are there many aspects weighed in - environment, quality, trends and function. Among the news you will find two exciting pillows. We have in one of them, used the material Water-gel®, which both breathe and gives a cool and fresh feeling. In addition, the pillow is organic and soundless.

For those who want to be more beautiful during the night are Skin + ® really exciting. The material is scientifically tested and through its capsules Carotenoids reduce wrinkles, while at the same time It is anatomically correct and fills our high demands for quality, design and comfort.

Read more about our soft added value on page 43.

Pillow Skin+®,
see page 43.

DESIGN & TECHNIC

WE LIKE SMART TECHNICAL SOLUTIONS. ONE EXAMPLE IS OUR BEDSIDE TABLE WITH BUILT-IN WIRELESS CHARGE, FOR EXAMPLE, TABLETS OR SMARTPHONES.

Phoenix
Verona fabric

PHOENIX

With Phoenix, you get a bed that fits your body perfectly. With less upholstery material between the pocket layers, this is our most comfortable bed so far. Phoenix gives you an individual pressure relief for your anatomy in all seven zones. Phoenix is equipped with a third and extra motor designed for neck adjustments. This allows you to enjoy maximum comfort whether you sleep on the back, side or stomach. To ensure the quality of the upholstery in our beds, we only use the best materials. In Phoenix, this consists of a high-quality pressure-reducing latex. With the modern floating design and integrated LED illumination in the legs of each bed, we have created a perfect combination of design, comfort in a bed that gives you much more than just a good night's sleep.

LYNX CONTINENTAL

Floating flexible comfort in a lighter package. We have succeeded in achieving this by combining a higher 5-zone pocket with a new Polytex upholstery material. Polytex is a foam reminiscent of our natural latex and creates a beautiful surface softness even though it is very light. With Lynx in your bedroom, you get the consistent and pressure-relieving comfort of 5-zone pocket for maximum comfort, no matter how you sleep. In the Duoflex model, you have the adjustable features that allow you to easily adjust the angle for your favourite sleep position, to enjoy a good book, just relax or maybe watch tv. Lynx is a bed in modern design with a host of amenities combined with very good comfort.

TOP MATTRESS

The top mattress is as underestimated as it is important. Maybe it's the fault of the name. Many people think that a top mattress is just something you need to hold the bed sheet. But a top mattress does so much more - it adapts to how you lie, and it lets your body breathe. At Viking Beds of Sweden we have chosen to manufacture our own top mattresses. In this way we can control material selection, upholstery and comfort. That is, everything that makes a really good top mattress. For example, if you choose our DL top mattress, you'll get Quallofils® unique 4-channel fibers and a core of zoned natural latex. The high-tech fibers effectively ventilate the body heat and help to remove the moisture your body produces every night. In addition, the hypoallergenic mattress pad counteracts the growth of mites, bacteria and fungi. Last but not least, a good top mattress gives you that really beautiful soft feeling that you will long for.

FOAM 6 or 9 cm thick
A simple but very affordable mattress. The core of high-resilience polyether and a comfortable polyester fabric makes you comfortable. The removable quilted fabric can be washed which makes the mattress perfect for the toddler family.

LATEX 6 or 9 cm thick
The core of this mattress is made of zoned, ventilating natural latex that perfectly fits your body and a comfortable polyester fiber. The quilted fabric can easily be removed and washed.

SUPERSOFT 8 cm thick
Supersoft contains a tufted core of high-resilient super-soft foam, providing a soft and comfortable sleeping position. The comfort layer is made of airy 4-channel polyester fibers that effectively eliminates moisture and heat and can be upholstered in a matching fabric to the bed. Also available in version Flex, for adjustable beds.

SL 6 cm thick
SL has a core of zoned, perforated natural latex that perfectly fits your body. The comfort layer is made of airy 4-channel polyester fibers that effectively remove moisture and heat. Also available in version Flex, for adjustable beds.

VITA TALALAY®
8 cm thick
Vita Talalay® is a truly unique form of latex with features like better support, superior surface softness and unrivaled breathability. The unique properties depend on the composition of the material, which gives an unbeatable elastic cell structure. Vita Talalay® therefore provides optimized pressure relief which reduces bone, joints and muscles pain. The permeability of the cellular structure creates a better sleep. The material feels cool during hot parts of the year and heats during the cold period. Can be upholstered in a matching fabric to the bed.

CIRRUS
8 cm thick
Cirrus is a top mattress where your body is aired efficiently using zoned natural latex that conforms to your body and provides optimal pressure distribution. To give the top mattress a fresh feeling, we have chosen to use Cirrus® which is micro-climate controlled filling. The fibers breathe freely and guarantees a better sleep. The Cirrus® fiber is recyclable and the manufacturing of the material is certified, providing security for you as a customer, now and in the future. Cirrus® can be upholstered in a matching fabric to the bed. Also available in version Flex, for adjustable beds.

DL
8 cm thick
With DL you get a top mattress where your body is vented through zoned, perforated natural latex that conforms to your body and provides optimal pressure distribution. And thanks to the comfort layer of Quallofil® Allerban®, not only is excess body heat removed but also mites, fungi and bacteria. DL can be upholstered in a matching fabric to the bed. Also available in version Flex, for adjustable beds.

BLU
9 cm thick
Cotton, latex and wool - with BLU your sleep is customized with cool stuffed cotton in the summer and warming wool in the winter months. The core of vented natural latex gives BLU a long service life while protecting you from moisture and excess heat. BLU can be upholstered in a matching fabric to the bed. Also available in version Flex, for adjustable beds.

TAGEL
8 cm thick
Tagel lets you sleep well on natural material - cotton, wool and real horse hair. Just like with BLU, this mattress is reversible with a summer side with cotton and winter side with wool. Can be upholstered in a matching fabric to the bed. Also available in version Flex, for adjustable beds.

Tailored bed mattresses for adjustable beds

FLEX
Our Flex top mattresses is customized to fit our adjustable beds. The top mattresses Supersoft, SL, Talalay, Cirrus, DL, BLU and Tagel are also available as Flex. The slit allows you to change the position of your adjustable bed without affecting the bed next to it. Flex can be upholstered in a matching fabric to the bed.

HEADBOARDS

We are proud of our headboards. Here is a great variety to choose from and the headboards fit to all our beds. Elegant, modern or classic, all in beautiful fabrics or leather - the choice is yours.

BED BENCHES, OTTOMANS AND BEDSIDE TABLES

Our ottomans are a smooth storage in the bedroom with gas hydraulic lid. As an option, our entire range of legs is available. Our bedside benches and ottomans are available in different sizes - choose between capitone or plain lid. The bedside table Art is available with any fabric and the bedside table Load charges your smartphone or tablet wireless while you sleep well.

BEDROOM GUIDE

– FIND THE RIGHT BED

As you read through this catalogue, it becomes easier to understand the differences between our beds and it will be easier for you to find a bed that fits your body, even your budget. Then you should test our beds, feel and squeeze the top mattresses and think about how you sleep and what comfort you want. Our dealers will help you with the guidance you will need to find the bed of your dreams. Visit us at www.vikingbeds.com to find a shop near you.

Choosing a bed is not particularly complicated. There are five things to consider;

BED TYPE

ZONES

FIRMNESS

DESIGN

BUDGET

WHAT KIND OF **BED** SUITS YOU?

Frame or continental bed? Should it be adjustable? To some extent the choice depends on what you prefer and what kind of taste you have. Many like the striking design of the bed, others prefer the robust construction of a continental bed with reversible mattress. It's good to ask yourself how you will use your bed. Perhaps you often watch TV or use the computer in bed? Yes, then maybe an adjustable bed will be the best for you.

CONTINENTAL BED

A continental bed consists of a boxspring base, a reversible mattress and a top mattress. Just the reversible spring mattress makes many people prefer the continental bed. Others choose the continental bed because, in many cases, it has more layers, which can be perceived as more comfortable and give a luxurious feeling.

ADJUSTABLE BED

This is the bed type for those who want to be able to choose different bed and sitting angles for example to relax, read, watch tv or work with the computer. But the adjustable bed is also good for those who want or need to have their legs higher sometimes. With three different models(Flex, DuoFlex and MultiFlex), you choose which function level you want: Flex and DuoFlex consist of a two-motor system, with which you can adjust the level of the legs and back. With MultiFlex and its three-motor system, you can also adjust the neck rest position.

FRAME BED

In our frame beds you will find a strong wooden frame which contains at least two pocket spring layers that conform to your body with different firmnesses. The top mattress give the frame bed a surface softness equal to all our bed models. The frame beds height makes it possible to place your bed in a room with for example slooping roofs.

COUNT **ZONES** INSTEAD OF COUNTING SHEEP

The bed with the most zones, do not necessarily need to be the best for your body. But a bed which adapts better to the body, almost always means a more comfortable sleep. Therefore, most of our beds have the upper spring layer divided into different zones. The pocket springs in these zones are adapted to the body's anatomy and provide more or less support along the length of the mattress. In this way, the mattress helps you to sleep in an ergonomically correct body position. In order to find out what suits you best, you should test and know carefully before deciding.

7-ZONES

Our finest beds have pocket springs with 7-zones which are adapted to every individual part of your body. They ensure lower pressure on head/shoulders and hips, while providing more support at the waist and lower back, to keep your spine straight when you lie on your side.

5-ZONES

In these beds, the torso and waist zones are combined into one, as are the thigh and knee zones. This zone division is perfect when you have a broader waist and hip.

3-ZONES

Compared with the 5-zone bed, we've combined two more zones, so the bed adapts to torso, hips and legs – which is usually ideal for people with broad or sore shoulders.

POCKET SPRING LAYER

Our pocket springs are the type of system that best adapts to your body. Each spring is held in place by separate fabric bags, which means they are loaded individually without affecting each other. It gives the pocket spring layer a superior comfort and compliance.

Beds from Viking Beds of Sweden only contain steel springs of the highest quality.

SOFTER SELECTED FIRMNESS* MORE FIRM SELECTED FIRMNESS* MORE FIRM SELECTED FIRMNESS* SOFTER
* Sected firmness can be soft, medium or firm. Read more about it in the part of "Which firmness suits you?".

WHICH **FIRMNESS** WILL SUIT YOU?

Our beds can be provided with soft, medium, firm and extra firm springs. Which one to choose depends to some extent on your weight and sleeping position. Generally speaking, the heavier you are, the firmer the bed should be. If you often sleep on your stomach, you should choose a firmer bed. But it is primarily the perceived comfort in the bed that determines what firmness to choose. That's why it's so important that you take the time to test different comforts properly before you decide. Our continental beds have through spring mattress, for both sides, but of course you can choose different firmness on each side.

WHAT **STYLE** DO YOU HAVE?

When you have chosen a bed, it's time to put your personal touch to it. You spend a third of your life in bed, so make sure you're comfortable with it. Colors, headboards, bed legs, pillows and ottomans (bed benches) can be varied in an infinite number of combinations, thus providing the perfect style for you and your bedroom. Read more about our accessories between pages 36-43.

HOW MUCH WOULD YOU LIKE TO **INVEST** IN YOUR BED?

We who devote our lives to constantly improving our products obviously want you to choose the best possible bed for you. But we also want it to have a price that will make you sleep even better. Therefore, do not be surprised that our high level of comfort and quality costs less than you think. Among other things, Viking Beds of Sweden was appointed the best brand of beds for three consecutive years.

A CLEAR **CONSCIENCE** IS THE (SECOND) BEST PILLOW

At Viking Beds of Sweden, we are at the forefront when it comes to making good quality beds, great comfort, thoughtful and beautiful design. This gives your body the best opportunity for good sleep and maximum recovery, but to get the optimum rest it is equally important that you can relax your thoughts. Therefore, we have put at least as much heart and soul into finding material that is not only kind to you but also to animals and nature. As far as possible, we have used environmentally certified materials. We are glad that our beds can be recycled when it will be time and we are also trying to think about logistics and transportation of our products. For us at Viking Beds of Sweden, our origins are important and to create a legacy for future generations are one of our most important issues in everything we do.

VIKING BEDS OF SWEDEN FAQ

You do not have to be a full-fledged specialist to find your dream bed - but knowing the basic terms makes it easier.

COROVIN

A protective material layer that prevents dust from penetrating the bed.

FIRMNESS

Some of our beds are available with soft, medium, firm or extra firm comfort. The basic rule is the more weight, the more firm it is.

LATEX

Used as upholstery in top mattresses and some beds. Latex is depressurizing and removes moisture.

POCKET SPRING

An exclusive suspension system in which each spring has been sewn in separate textile bags that are then assembled into a mattress.

FOAM

A polyurethane foam used in mattresses.

POLYTEX

Polytex is a foam, a upholstery material. Its characteristics resemble natural latex but at the same time have a lower weight.

POCKETS

The pocket spring is used to give the bed different comfort and firmness. Depending on the number of layers in the mattress, it can be single, double or triple. Our beds have up to four layers.

RECOFELT

A upholstery material made of recycled polyester.

VIPP

We build our adjustable beds on a tilt structure based on plywood.

REVERSIBLE POCKET

A reversible mattress with a pocket spring.

X-POCKET

A premium pocket that delivers superior surface softness and reinforces the spring depth and pressure relief.

ZONES

The mattress can be divided into 1-7 different zones following the anatomy of the body.
